

## Canadian Global School Teacher Certificate Program Overview

### Introduction

Canadian Global School's High School Teacher Certificate Program is a blended solution for training effective local teachers to deliver a strong educational program founded on the Ontario model of education. It is devised to introduce the Classroom Teachers not only to the Ontario Curriculum overall and specific expectations and the unique academic delivery model of our Partner School program, Canadian Global School's professionally developed proprietary curriculum and Learning Management System but to provide Classroom Teachers with all the strategies, resources and ed-tech tools they need to deliver an engaging and robust high school program with a focus on more complex skill development and differentiated learning in a 21st-century grounded pedagogical learning environment.

### This Comprehensive Training Program Consists of three Formats of Learning:

**Our exhaustive teacher training program is available in two essential programs to better align the priorities of new classroom teachers' skill development and professionalism with the program delivery timetable.**

**Teacher Qualification Part 1 (TQ Part 1)**

**Teacher Qualification Part 2 (TQ Part 2)**

## Teacher Qualification Generalist Certificate Program (TQ Generalist)

Our **Teacher Qualification Generalist (TQ Generalist) Certificate Program** is designed to introduce new teachers to our OSSD Partner High School and Elementary School program, our differentiated and higher-order thinking skill-focused teaching practice, our Canadian Global School learning management platform, and all our professionally developed and proprietary curriculum resources. Before the school year, teachers participate in the TQ Generalist Certificate Program to prepare to seamlessly deliver the OSSD program in their classroom from the first day of classes. New teachers will focus on the foundational knowledge needed to understand differentiated Instruction and higher-order thinking skill development in the Canadian Global School OSSD curriculum, how students are assessed and evaluated according to OSSD Growing Success policy and how Canadian Global School's comprehensive instructional resources can help them to create a collaborative and student-centred environment for learning from day one. New Teachers also have an opportunity to preview sample instructional strategies in action with demonstrations from Canadian Global School expert teachers. Additionally, the TQ Generalist training helps classroom teachers familiarize themselves with our school's academic policies, the teacher management tools on the Canadian Global School Learning Management System, and Canadian Global School's teacher supports to help establish a smooth program operation from the start. Upon completing this TQ Generalist Program, the classroom teachers will receive a Canadian Global School certificate in TQ Generalist Qualification.

**Time Commitment:** 5 Weeks duration with a total of 27 hours of learning

## Teachers Qualification Generalist (TQ Generalist)

*For more detailed information, please refer to Outline.*

### Grading Scheme of TQ Generalist

The final grade of Teachers Qualification Generalist (TQ Generalist) is divided into two main parts:

- **80%** for Teaching in Practice Activities and
- **20%** for Participation of Live Zoom Sessions.

#### Participation

### Live Zoom Sessions

- Session 1   ● Session 2   ● Session 3
- Session 4   ● Session 5

#### Teaching in Practice Activities

- Quizzes
- Short Answers
- Case Studies
- Video Demonstrations
- Written Reflections

## Teacher Qualification Specialist Certificate Program (TQ Specialist)

**Teacher Qualification Specialist (TQ Specialist) Program** is a subject-specific training program designed to introduce teachers to advanced instructional strategies that enhance students' learning and improve academic achievement. New teachers participate in this training component once they are in the classroom and working directly with students. This allows them to implement their learning immediately and turn theory into practice in their specific subject area. The **TQ Specialist Certificate Program** training builds on the learning from the **TQ Generalist Certificate Program**. It provides teachers with the advanced skills they need to develop students' higher-order thinking skills further and to be able to differentiate and scaffold learning for a diverse group of students. For example, new teachers will learn to use questioning in the classroom to prompt deeper learning and use their students' work to look deeply at how assessment and evaluation can support their students' achievement. New teachers will also participate in grading moderation workshops facilitated by Canadian Global School subject grading teachers, gain a deep understanding of evaluation criteria, and adopt practical strategies to support students to demonstrate their learning. Additionally, this program provides many opportunities for subject-specific teachers to share their successes and challenges with Canadian Global School experienced teacher trainers and their subject colleagues at different schools. Upon completing this **TQ Specialist Certificate Program**, the classroom teachers will receive a Canadian Global School certificate in **TQ Specialist Certificate Program**.

**Time Commitment:** 5 Weeks duration with a total of 27 hours of learning

### Grading Scheme of TQ Specialist

The final grade of Teachers Qualification Specialist (TQ Specialist) is divided into three main parts:

- **60%** for Teaching in Practice Activities
- **10%** for Participation of Live Zoom Sessions and
- **30%** for Final Evaluation

#### Final Evaluation

- Lesson Plan
- Lesson Demonstration

#### Participation

#### Live Zoom Sessions

- Session 1
- Session 2
- Session 3
- Session 4

#### Teaching in Practice Activities

- Evaluation Exercise
- Video Demonstrations
- Written Reflections
